Patients Treated in Smiles for BIG Kids (SFBK) . . .

A RECOVERING METH ADDICT with a “bombed out” mouth is given a second chance at a beautiful smile. With the help of a volunteer oral surgeon and general dentist, through our Smiles for BIG Kids program, she can now smile with confidence and has the opportunity to get her life back in order.

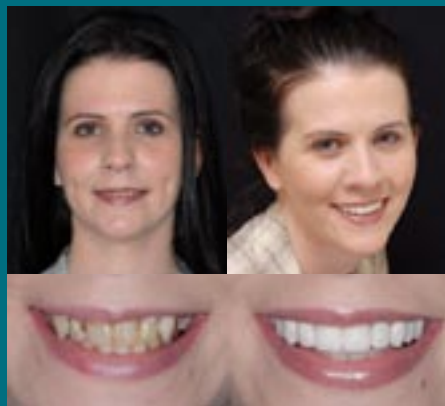

AN EMANCIPATED YOUTH who has been in foster care her whole life wakes up one morning with lots of pain and swelling and suspects that it is one of her wisdom teeth. She is on her own, in the process of getting her Masters and in no way able to afford an extraction of a wisdom tooth. In a matter of two hours, Smiles for BIG Kids was able to get her into a general dentist to make sure there was no infection (there wasn't) and within a week the tooth was surgically removed.

AN ELDERLY WOMAN falls in her apartment and is not discovered for seven days. She broke her front teeth during her fall, which caused her a lot of pain, not to mention a broken smile. She is on a fixed social security income and in need of a removable partial or bridge. If it weren't for Smiles for BIG Kids she would likely still be suffering with broken teeth.

AN 80-YEAR OLD VETERAN from the Korean War has a tooth with an open cavity causing him pain. He is on a severely set income and has no insurance to pay for the crown he needs. He is now pain free, due to a partnership between SFBK and a volunteer general dentist.

A HOMELESS MOTHER of three children moves into a women's shelter to begin the process of improving her life and the lives of her children. Before she became homeless she owned and operated her own pallet recycling company. During this time she suffered a couple of hard blows to the face, breaking and knocking out most of the teeth. It is her hope that through Smiles for BIG Kids she will have her front teeth replaced so she can smile again showing all her teeth.
